Hirsh, Steven has shared a OneDrive for Business file with you. To view it, click the link below.

February 28 2018 R3 PFAS Update.docx

<!--[endif]-->

Hi Sasha,

Attached are two documents that provide current information on PFAS activities in region III.

The spreadsheet is most inclusive. It is currently sorted by site name but you can resort by state. I think you were planning to add a column with Congressional District to this document. Please send us the revised table and we will capture that column so it will be available in the future.

The second document contains short discussions about current and near future actions/issues. Perhaps something for you to keep handy if additional information is needed on a specific PFAS topic.

Let me know if you need anything else on this.

Thanks
Steve

Perfect, thank you Steve!

This spreadsheet is what I had in mind, as I know you made mention to me at a previous internal PFC meeting that this spreadsheet could serve helpful regarding requests from the front office. I can use this to get started...and will look forward to the update version the end of this month.

Hi Sasha,

Can you work with an update version of the attached? Its purpose is to give basic, general information about all our PFAS sites. We are working on keeping this up to date and hope it will answer most requests for across the Region PFAS inquiries.

If this works for you I'll have an up to date version to you before the 28th.

Steve

Importance: High

Hello there,

I plan to raise this request at the PFC Mtg. RA Servidio will be attending the ECOS meeting this coming March (Minneapolis). I have been tasked to compile a list of all the PFC sites within our region along with a very brief status of each site. Cosmo seems to be a minimalist when it comes to providing him information...so less is more regarding the status/blurb being requested with the PFC site listing. If you could either point me to an area where I could compile this information myself or provide an existing document that I could summarize, that would be great.

Preferred Format:

Site Name – Site Location (City, state)

Blurb which provides the status of the site thus far to EPA's knowledge (*1-2 sentences at best*)

Please do provide response by Feb 28th COB
